“If it's world war 2 then war may be a positive number.

So some political slogans may be, "I bring change"

Change is relative, if the economy and other facts are good then that comment sounds unwise or bad. This is like floating point math.

"We need change" if thing are going well, then that's a negative number equation and if things are going "bad" that's a positive number. So that's a floating point equation with a floating point number. It’s not words its math.

"You look nice today"

"You" is perhaps a big positive number in this equation. But it’s because of the "numbers" at the end of that equation.

"nice" is a "good number" say +70 and today is a zero number.

you = 200

look = 0

nice = 70

today = 0.

270

So you may feel "happy" about that comment but only because the numbers register positive in your mind.

As "nice" increases in value your overall score is increased.

"You look excellent" = high positive number = nice feeling

"You look shitty" = High negative number unless said jokingly.

"You smell terrible" = High negative number

So this mind is reacting to number equations.”- Copyright TXu 1-990-315

“An action or strategy carefully planned to achieve a specific end.

A plan of action or policy designed to achieve a major or overall aim.

So the main tactic is to confuse the being to the degree they forget who they are and the strategy of course starts with education.

Alter perception with the favoring of a hemisphere in the child and so the child becomes confused and so the overall strategy is the being is confused.

If a person thinks they are anything other than what they are then the strategy has worked and in this case the person factually is a member of a ghost people tribe and at this stage that tribes like most tribes on the planet have been splintered to the degree the tribe itself no longer exists so the overall strategy is to make sure the person is disassociated with their tribe of origin.

Since the aspects relative to this strategy are ruthless and in their goal anything goes no matter what it is simply because they have absolute control, that tactic must also be adopted. In the end anything goes no matter what it is because there is not a winning possibility only abilities to make dents to the overall offensive strategy.”- Copyright TXu 1-990-315

“So the open aspect that is considering is that aspects may think that this or that is perhaps the scary or dangerous aspect and so that perceived scary aspect would be a factor in their behavior although one thing to perhaps consider is these younger brothers and sisters spiritual aspects that may be encountered at some stage in forever infinity and that child spirit would be immediately aware that you were perhaps aware of some sort of out so that they would perhaps not have had to go into forever infinity believing soundly that whoever made them ruined their mind to the degree that they decided to check out when in reality it was the education conditioning that caused the perception disorder and that led to them determining to check out because of some trivial matter in reality that they would have no decided to check out as a result of without conditioned perception reality as a result of sorcery and/or literacy exposure.”- Copyright TXu 1-990-315

“Someone would be facing that child spirit aspect and that aspect may deduce that you were aware of that situation and decided to be safe from some other perceived danger and opt out of explaining it to them and so now you are facing them, and they are aware of the reality and your decisions and it would perhaps be some sort of ultimate dissatisfaction that a being would be confronted with the actuality of their decisions.

Their decision to avoid one perceived threat and the reality that, that safe decision considering who they are facing now, was not a safe decision at all, in fact the perceived threat was not a threat in contrast to the threat they are now facing.

And so attempting to be safe works initially because a being perceives they are safe but as the scale of infinity is unpredictable a safe decision today may be perceived as a fatal decision tomorrow on the scale of infinity.”- Copyright TXu 1-990-315

“Would you rather face a spirit child who is in the scale of infinity or a PERCEIVED THRET THAT IS IN THE SCALE OF LIMITED EXSISTENCE?

This is perhaps how some people see things. If you are safe now you will be safe forever, or if you made a decision today that effect will carry on into infinity.

Swimming in the ocean in a certain spot today may be safe but on the scale of infinity sitting in that spot at a later date may be fatal.

Child spirits who are angry cannot be reasoned with usually because the living have been exposed to the literacy and or sorcery and thus are not capable of reasoning, not because they are unreasonable, but because the argument with the child spirit usually relates to why it was okay to make that child spirit angry to begin with. Simply put, humans are a Ghost People Species and exposing them to literacy and or sorcery destroys their mind perhaps on a scale of infinity and thus their trajectory is destroyed, and thus those members of the ghost people species who are “okay” with that even after learning that, are no longer considered members of the human ghost species but instead, threats to the ghost people species.” - Copyright TXu 1-990-315

“One perhaps obvious goal of education and or sorcery outside of the obvious main goal that is perception altering through repetitive tasks disfavoring one hemisphere or favoring one hemisphere, is to convince the student of a scale of intelligence or awareness of a situation and then once that is achieved it is easy to push the student to accept their position in a group of people.

If a student gets a 60 on a spelling test and 10 students get a 95 on the same test in the same classroom then that student after repetitive testing will be convinced that those student who scored 95 are factually more intelligent and will treat or act a certain way around those students accordingly, including envy and admiration aspects.

This can be transferred to any situation in life as long as the student is convinced they are not intelligent as most in literacy and or sorcery then they begin to live like that and that is one aspect of civilization that is a tool that keeps the system going.

So the pecking order in civilization is God is at the top and the most evil person of all is at the bottom but these words of course are reversed in reality because of the reverse thing.

That’s means the most evil is at the top and the most good is at the bottom.

Meaning the most good person on the planet is well alone somewhere and generally speaking, no one will ever meet them or if they did they would see them as worthless , stupid.

The most evil person in the world they would see them as intelligent, educated, wise, rich, smart, wealthy, and powerful.

It’s like the girl who was in a foreign country and she was helping the needy and she was about 18 or so and she wrote on her web site that she was happy to be doing what she was doing helping people in this third world country and that was the last post she made on the net, if you are on it you are in it, and he throat was slight shortly after that post.”- Copyright TXu 1-990-315

“No deed goes unnoticed, but in this system(ritual) of civilization it is not important what side you are on, in reality because the system itself is failed, a failed system and a perfect sorcery ritual.

Being good in a failed system is the same as being bad in a failed system and ignoring the system is the same as noticing the system and idolizing the system is the same as hating the system.

The only side there really is that is acknowledge in the system (ritual) is the side attempting to destroy the ritual.”- Copyright TXu 1-990-315

“The ones attempting to destroy the ritual would be the only competitor to the ritual system because every other side is in fact, helping the ritual system.

And the saying “faith is living without scheming” is actually impossible to ever achieve it is like saying “not reacting to reality means you are smart”, or “not facing reality means you are religious.”

“not noticing the girl staring at you with a smile on her face means you are wise.” I is a non-sense comment that is impossible to achieve.

“no scheme is a scheme.”

“no plan is a plan.”

Deciding to not notice means you are reacting to the fact you have noticed and acted upon it.

Not caring means you have decided to act in a way that prolongs your situation and that is a symptom you do care.

Caring to obviously means you have decided to out yourself and thus as far as yourself you do not care.

Absolutes cannot happen because if they could happen they would swiftly eliminate their self because of the environment.

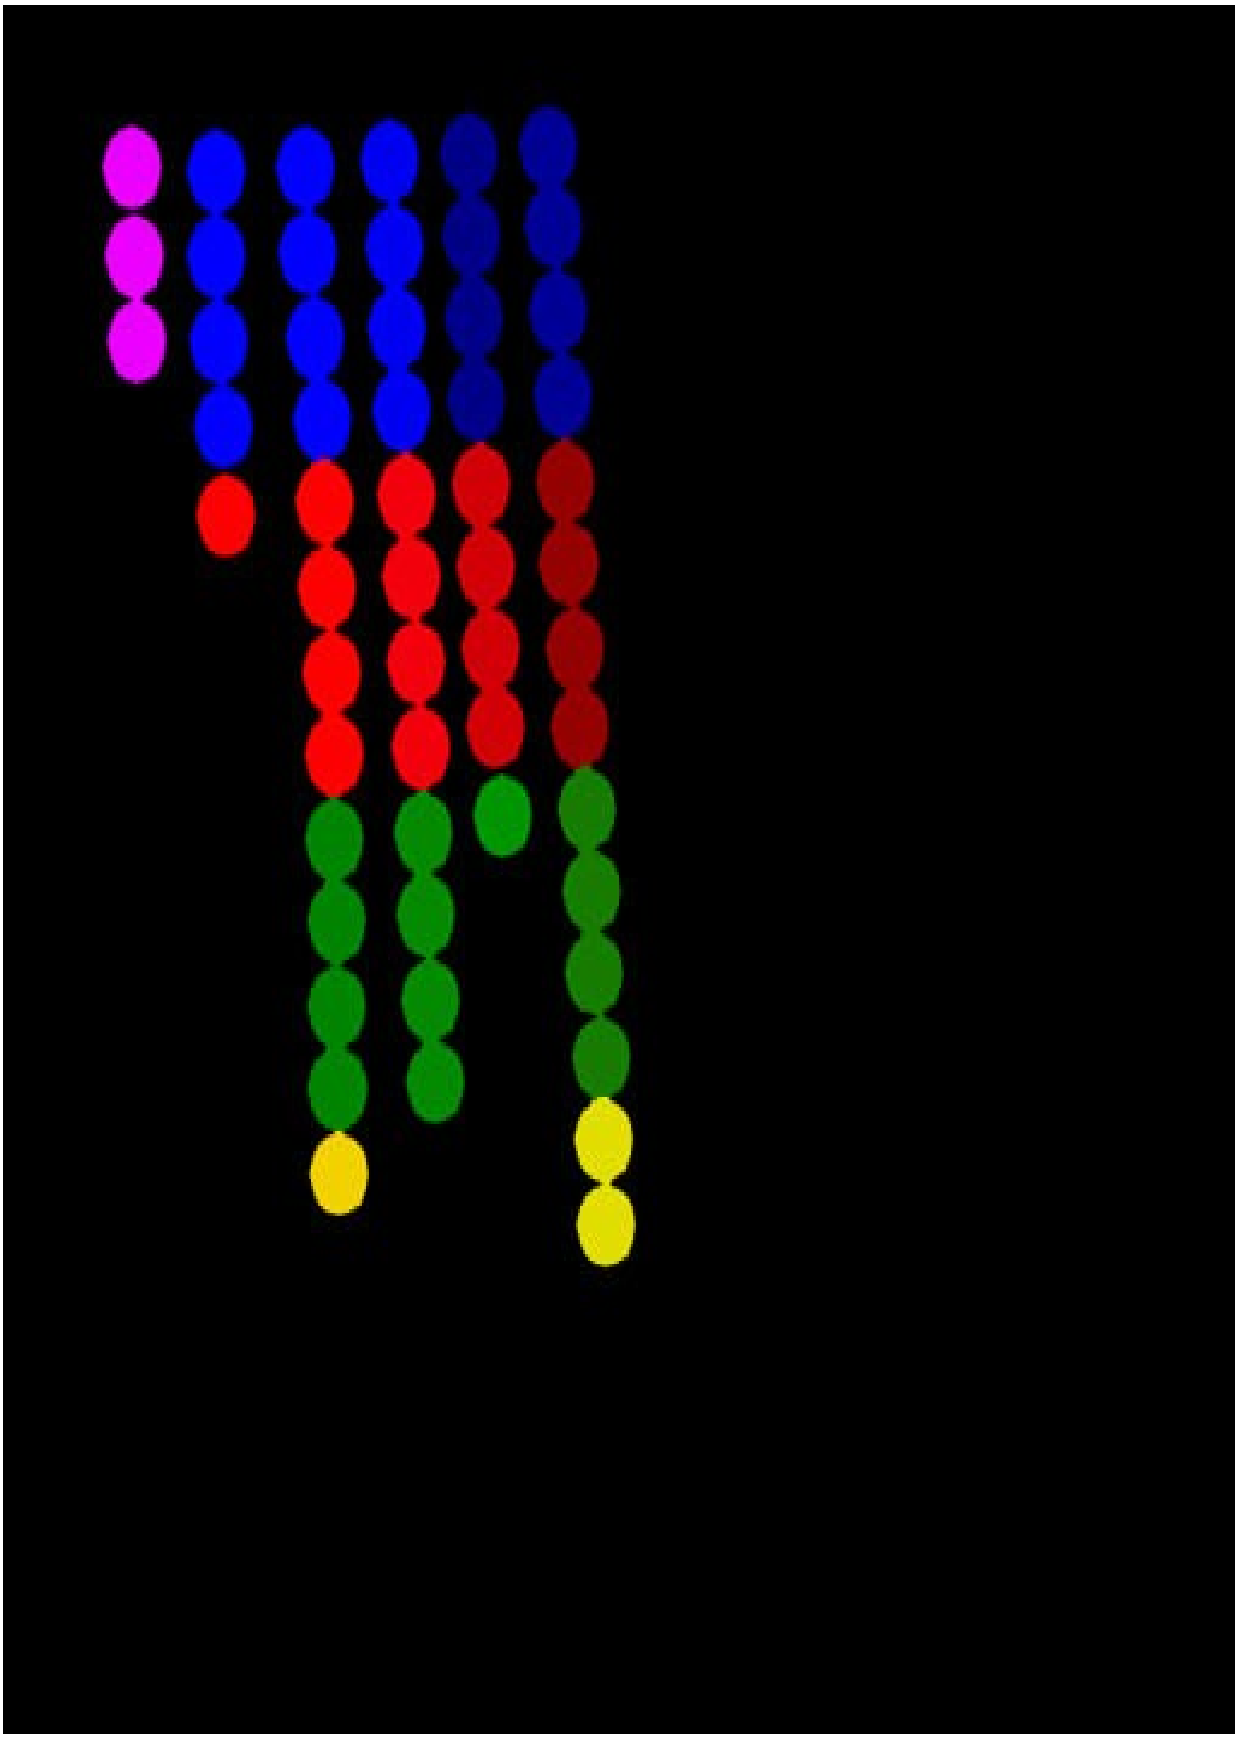
If one decides to always be good then whatever that criteria is, they will eventually encounter a situation that they cannot always act like that so accepting that challenge means a person is concerned about whatever being bad is.11/4/2015 10:09:31 AM”- Copyright TXu 1-990-315

“Most attempts to find a cause for the system ends with seeker finding that an inanimate object is to blame: reading, writing and math or as it was initially called sorcery and or magic, and so they must seek to find something less to blame and that’s where perception lies.

“Is it the school teacher in kindergarten or the school teacher in high school more to blame, or is it the system itself that requires money so people have to get a job and sometimes they decide to get a job as a math teacher or English teacher.

So then the money aspect to live becomes the issue but that is a deeper symptom of numbers so numbers are inanimate.

Settling is harsh. Four in a row Joe, showed us how to go, way against the flow, so few ever show, fuck the boat just row.”- Copyright TXu 1-990-315

“To become a ghost Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it.”- Copyright: TXu 2-037-947


“Extinctionist: Noun: A personality and/or group that is aware their behavior or actions will lead to their extinction and they continue anyway. “ - Copyright TXu 2-008-596
